Software Engineer

 johan.posito@gmail.com  
 1998-07-04

Hello, I'm Johan, a passionate full-stack web developer with experience in a wide variety of technologies and tools. My primary focus is on creating robust and scalable web solutions that meet the needs of my clients and users. Today, I want to give you a glimpse into my technological world and how I've used my skills to tackle challenges in web development.

## WORK EXPERIENCES

### Backend developer

JOONIK SAS | 08-2022 - 05-2023

The developments that I made for this company were hand in hand with a team of web designers, product manager, devops, I developed different applications for this company. A very robust social network which allows more than 2000 users simultaneously making requests to the same endpoint, develop an enterprise application that centralizes the contract models of a company in one place, and also provide support to previously developed applications, The technologies I used in this company for the developments were: Node.js, Javascript, React, Docker, AWS, PostgreSQL, Git, PHP, Laravel, Vue.js

### Development engineer

MARVAL S.A. | 07-2021 - 07-2022

Most of the development was done in the low code ERP JD Edward Oracle, I developed different applications for generating accounting reports, internal applications and also provided support to previously developed applications, the technologies used in this company for the developments were: ERP: JD Edward Oracle, Javascript, Node.js, Windows Server, Azure Cloud, Oracle Database.

### FullStack developer

GRUPO APL INGENIERIA | 01-2021 - 06-2021

We develop different projects of software POS, Ecommerce applications. The technologies that I used in this company for the developments were: C#, .Net Framework, Javascript, SQL Server, HTML, CSS.

### Software developer

HOSPITAL SAN FRANCISCO DE ASIS | 02-2018 - 11-2020
